KISTERS

WISKI helps you develop a comprehensive understanding of your water data.

WISKI | Water Resources Data Management

A **flexible** and **scalable** system with the power to manage your BIG-WATER data.

WISKI* (Water Information Systems KISTERS) represents the culmination of more than 25 years of experience developing software solutions for the water industry. WISKI is a proven data management platform that integrates numerous application modules with powerful statistical, data analysis, modeling and visualization features.

WISKI is the standard platform for numerous public agencies and private organizations who are dedicated to long term monitoring and sustainable water resources management.

Our customers use WISKI for...

- **Surface Water Records Management and Reporting**
- **Water Quality Management and Reporting**
- **Real-Time Flood Management and Alarming**
- **Wastewater/Urban Water Management and Reporting**
- **Groundwater Data Management and Analysis**
- **Drinking Water, Water Meters and Leak Detection**
- **Hydroelectric Operations and Reporting**
- **Dam Safety Monitoring, Alarming and Reporting**
- **Irrigation/Water Supply Management and Reporting**
- **Drought/Water Supply Planning, Analysis and Evaluation**
- **Meteorology and Hydrometeorology**

Did you know our team of water resource specialists are ready to help you at every stage of your project?

From inception to completion, our technical support advisors get you up and running - and working with your data quickly!

**Call 916-723-1441 and learn how we can help!**
WISKI Modules

WISKI BIBER
Manages discharge measurements for surface water stations including single, two, three or n-point measurements. Ideal for use in the field and in the office.
WISKI SKED
Powerful rating curve tool for creating, managing and optimizing non-linear conversions of input parameters for hydrological data.
WISKI MAP
Mapping that provides spatial insight into your temporal data. Integrates with ESRI ArcGIS ™ for advanced analysis of station, time series data and water quality samples.
WISKI Water Quality & KiECO
Manage, analyze, map and report water quality and biological sampling data using both quantitative and qualitative approaches.
WISKI Alarm Manager
Real-time alerts that provide heightened awareness of changing conditions in the field. Alerts sent via FTP, fax, email, SMS and voice messages.
WISKI Web Public, Web Pro, KiWIS
Connect your water data to internal and external stakeholders via the Internet/API. Share publicly with basic preset layouts or provide direct access to the database.

WISKI SODA
Centralized and automated collection of remote field data via telemetry technology. Push-and-pull commands for remote data planning and collection.

WISKI IReD
Interactive and customizable report designer that combines measurements, meta data, tables, graphs, maps and images into your reporting layout.
